Photo Sharing

[This problem may have been done in the class. Whatever the instructor taught you supersedes the following]

Design a photo-sharing service like Instagram

1. Ability for a user to share images and other users to follow and discover images

2. Search and discovery are important.

Reading pointers:

Not much info out there, except this one: http://highscalability.com/blog/2011/12/6/instagram-architecture-14-million-users-terabytes-of-photos.html
